Lemari Es Hemat Listrik

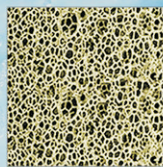

GREEN TECHNOLOGY

Tingkat Hemat ENERGI

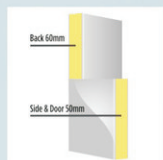

Lemari Es Sanken merupakan lemari es paling efisien di kelasnya. Dinding HD yang tebal dan padat, dilengkapi dengan karet pintu berkualitas, menjadikan Lemari Es Sanken meraih skor rata-rata Running Ratio 36%. Artinya, lemari es Sanken lebih cepat dinginnya, suhu dan kesegaran makanan lebih stabil dan terjaga, kompresor bekerja lebih singkat dan paling hemat energi.

Insulasi Paling Padat (HD) - Lebih Efisien

Pengembangan baru proses insulasi Polyurethane dengan kepadatan tinggi - Dinding High Density Insulation (Dinding HD) - mencegah adanya kekosongan / kelunakan pada dinding insulasi sehingga Lemari Es Sanken mampu menyimpan dingin lebih lama.

Insulasi Paling Tebal - Kapasitas Tetap Besar

Dinding HD Lemari Es Sanken mempunyai ketebalan 50mm (samping/pintu) dan 60mm (belakang), sedangkan merek lain hanya mempunyai ketebalan rata-rata 40mm dan 50mm. Dinding HD membuat lemari es lebih cepat dingin dan suhu dingin lebih terjaga.
